Rohit Verma

8057412984 Gurugram, Haryana verma.1107@gmail.com Rohit Verma TheVerma11 Portfolio

Summary

Computer Science Ph.D. Scholar with an MCA in Computer Applications. Proficient in Python, SQL, Data Analysis, Machine Learning, and Full-Stack Development. Skilled in Power BI, Pandas, Scikit-learn, React.js, Node.js, and MongoDB, with hands-on experience building data-driven applications and dashboards. Strong in analytical problem-solving and eager to contribute to a technology-focused organization.

Education

UOU, Uttarakhand — **Pursuing**
Ph.D. in Computer Science — *Haldwani, Uttarakhand*

Graphic Era Hill University — **Sep 2022 – Aug 2024**
Master of Computer Applications — *Dehradun, Uttarakhand*

UPES — **2022**
Diploma in Cyber Security — *Dehradun, Uttarakhand*

Kumaun University — **Sep 2019 – Aug 2022**
Bachelor of Computer Applications — *Almora, Uttarakhand*

Research Experience

Uttarakhand Open University — **2025 – Present**
Ph.D. Research Scholar – Computer Science — *Haldwani, Uttarakhand*

- Researching privacy-preserving AI and computer vision for assistive applications.
- Exploring Split Federated Learning and on-device vision inference for privacy-aware AI systems.
- Developing a cross-platform mobile application using .NET MAUI and C# to support research-oriented AI applications.

Projects

J.A.R.V.I.S: Personal Virtual Assistant | *Python, Tkinter, SpeechRecognition*

- Developed a modular personal virtual assistant supporting voice and text commands for web search, weather, YouTube, Wikipedia, and everyday utilities.
- Implemented SpeechRecognition, SoundDevice, and pyttsx3 for voice input and Text-to-Speech interaction with Windows system controls.
- Built a futuristic Tkinter GUI with animated HUD, command terminal, screenshot capture, system monitoring, and desktop automation features.

VegeIsland: Full Stack Vegetable Market Platform | *React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack MERN application for browsing vegetables and managing an online vegetable marketplace.
- Built RESTful backend APIs using Node.js and Express.js with MongoDB for user and product data management.
- Integrated user authentication, product management, and Stripe-based checkout functionality with a responsive React.js frontend.

Exploring Coffee Quality Data Using Power BI | *Power BI, Excel, Data Analysis*

- Analyzed coffee quality data to identify patterns, trends, and factors affecting coffee quality using Power BI.
- Performed data cleaning, transformation, and exploratory analysis to prepare the dataset for interactive reporting.
- Created interactive dashboards and visualizations to communicate data-driven insights and support analytical decision-making.

Technical Skills

- **Programming Languages**: Python, R, SQL, JavaScript, C#
- **Frontend Development**: React.js, HTML5, CSS3, TailwindCSS, Material UI, Responsive Design, Tkinter
- **Backend Development**: Node.js, Express.js, RESTful APIs, API Integration
- **Mobile App Development**: .NET MAUI, XAML, MVVM, Data Binding, SQLite, Cross-Platform App Development
- **Databases**: MongoDB, MySQL, SQLite, Database Design, CRUD Operations
- **Data Analysis & Visualization**: Pandas, NumPy, Matplotlib, Seaborn, Statsmodels, Power BI, Advanced Excel, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), DAX
- **Machine Learning & Deep Learning**: Scikit-learn, TensorFlow, PyTorch, Regression, Classification, Clustering, Neural Networks, NLP, Model Tuning, Model Evaluation
- **AI & Automation**: SpeechRecognition, pyttsx3, SoundDevice, Computer Vision, AI Assistants, Desktop Automation
- **Developer Tools**: Visual Studio, VS Code, PyCharm, Jupyter Notebook, Google Colab, Postman, Git, GitHub
- **Other Technologies**: Stripe, Object-Oriented Programming (OOP)
- **Operating Systems**: Windows, Linux, macOS

Certifications

- **Certified Data Science Professional** — OdinSchool
- **CS250: Python for Data Science** — Saylor University
- **Meta Back-End Developer** — Coursera
- **Programming in Python** — Meta, Coursera
- **Introduction to Databases for Back-End Development** — Meta, Coursera
